About the Institutions

Vikas College of Engineering & Technology was established in the year 2008 one of the best known self-financing Integrated educational Institutions aiming to provide excellence in Engineering and Management studies. It is governed by Saraswathi Vidya Peetam to encourage aspiring students with very good Academic record. It offers Under graduate Engineering (Civil, EEE, Mechanical, ECE, CSE, CSE-AIML, CSE-DS and Agriculture) along with PG M. Tech (CSE, ES, SSP, PEED, SE and TE), and MBA. It has a strong Industry-Institute partnership, Entrepreneurship cell and R&D cell to enhance the practical knowledge of the students.

Programme Objectives:

The main objectives of the program are:

1. To Identify the components of a computer network.
2. To learn implement basic configuration on a Cisco router.
3. To enhance the knowledge of IPv6 main features and addresses

Email :niranjanmsr@gmail.com
Contact No: +91-73821 05191
- No. of students enrolled** : 42
- Objective of the Programme** :
1. To identify the components of a computer network.
 2. To learn implement basic configuration on a Cisco router.
 3. To enhance the knowledge of IPv6 main features and addresses.
- Topics covered** : **Module-I:**
Components of a Computer Network Basic characteristics, host-to-host communication, features, and functions of the Cisco Internetwork Operating System (IOS®) software - LANS and the role of switches within LANS, Ethernet network access layer of TCP/IP and Operation of switches - Install a switch and the initial configuration.

Module-II:

TCP/IP Internet layer, IPv4, its addressing scheme, and subnetting, TCP/IP Transport layer and Application layer, Functions of routing, Cisco router, host-to-host communications across switches and routers - Common switched network issues and IPv4 addressing.

Module-III:

IPv6 main features and addresses, configure IPv6 connectivity - Operation, benefits, and limitations of static routing, Virtual Local Area Networks (VLANs) and trunks - Application and configuration of inter-VLAN routing, Dynamic routing protocols and Open Shortest Path First (OSPF).

Learning Outcomes

: On Successful completion of the course ECE students will be equipped with a technical skill currently in demand in the job market along with fundamental principles of networking further empowered for their future job prospects in CCNA.

1. Understand and able to identify various components of computer networks.
2. Explore and Implementation of Cisco Router Enhance the knowledge of IPv6, STP and RSTP.

The course is very useful to the students and their feedback is positive. The management and Dr. B. Ramana, Principal of **Vikas College of Engineering & Technology** thanked the resource person and participants for making the program successful.

Date: 06/08/2022

CIRCULAR

It is planned to conduct an add on Certificate Course on “PCB Designing” from 22-08-2022 to 20-09-2022 by **Mr. S. Murahari**, Assistant Professor, Vikas College of Engineering & Technology for all II B.Tech students of ECE

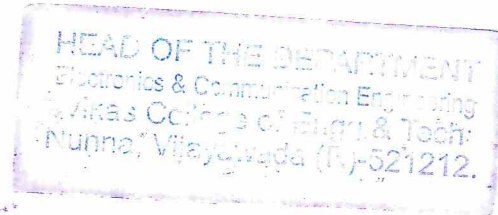

This course is **MANDATORY** and All II B.Tech-ECE-DEPARTMENT-1 students should attend the program without fail. The students who complete the course successfully will get the certificate from the department.

Venue: Room No - B302

Co-Ordinator: Mr. G. Suresh, Assistant Professor, ECE Department

Course Coordinator

HEAD OF THE DEPARTMENT

Circulate to

1. Staff of the Department
2. All II Year Students
3. Notice board & File

About the Institutions

Vikas College of Engineering & Technology was established in the year 2008 one of the best known self-financing Integrated educational Institutions aiming to provide excellence in Engineering and Management studies. It is governed by Saraswathi Vidya Peetam to encourage aspiring students with very good Academic record. It offers Under graduate Engineering (Civil, EEE, Mechanical, ECE, CSE, CSE-AIML, CSE-DS and Agriculture) along with PG M. Tech (CSE, ES, SSP, PEED, SE and TE), and MBA. It has a strong Industry-Institute partnership, Entrepreneurship cell and R&D cell to enhance the practical knowledge of the students.

Programme Objectives:

The main objective of this program is

1. Identifying Electronic Components Symbols & Footprints
2. Constructing your Component libraries & use them effectively
3. Schematic creation & interpretation
4. Effective use of design rules & interfacing between schematic & PCB
5. Component placement & routing techniques for various technologies

PROGRAMME REPORT

- Name of the Programme** : A Certificate Program on “PCB Designing”
- Date** : 22-08-2022 to 20-09-2022
- Details of Resource Person** : **Mr. S. MURAHARI**
M.Tech in SYSTEMS AND SIGNAL PROCESSING
Assistant Professor
Vikas College of Engineering & Technology
Nunna, Vijayawada Rural
Email : muraharisunkara@gmail.com
Contact No: +91-9441303053
- No. of students enrolled** : 36
- Objective of the Programme** :
1. Identifying Electronic Components Symbols & Footprints
 2. Constructing your Component libraries & use them effectively
 3. Schematic creation & interpretation
 4. Effective use of design rules & interfacing between schematic & PCB
 5. Component placement & routing techniques for various technologies

Topics covered

1. Components Identification
2. Components Symbol and their Footprints
3. Circuit Design
4. Simulation
5. MATLAB Basics
6. MATLAB Graphics
7. Programming Using MATLAB
8. Simulink
9. Production of PCB Layout
10. Applications
11. Advantages & Disadvantages

Learning Outcomes

1. The Students will be able to design a schematic of their circuit
2. The Students will be able to to design PCB layout of their design
3. Students are capable to produce PCB of their own circuit.

The course is very useful to the students and their feedback is positive. The management and Dr. B. Ramana, Principal of **Vikas College of Engineering & Technology** thanked the resource person and participants for making the program successful.

VCTN/ECE/2022-23/03

Date: 16/08/2022

CIRCULAR

It is to inform all IV B.Tech students of ECE that an add on Certificate Course on “Sensor Technology” by Mr. B. Venkateswara Reddy, Associate Professor, Vikas College of Engineering & Technology bearing the Program Code: 04 & Course Code: ECE2203 is introduced in our department.

Hence all ECE students who are interested to attend can register their names with the concerned ECE department coordinator on or before 25-08-2022. This course is scheduled from 01-09-2022 to 30-09-2022.

All registered students must attend the classes without fail. The students who completed the course successfully will get the certificate from the department.

Venue: Room No-B312

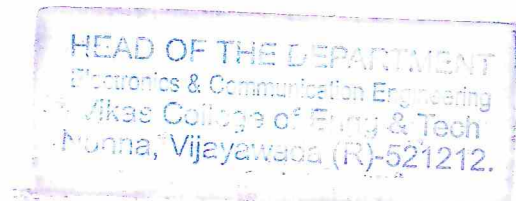

Co-Ordinator: Mr. G. Suresh, Assistant Professor, ECE Department

About the Institutions

Vikas College of Engineering & Technology was established in the year 2008 one of the best known self-financing Integrated educational Institutions aiming to provide excellence in Engineering and Management studies. It is governed by Saraswathi Vidya Peetam to encourage aspiring students with very good Academic record. It offers Under graduate Engineering (Civil, EEE, Mechanical, ECE, CSE, CSE-AIML, CSE-DS and Agriculture) along with PG M. Tech (CSE, ES, SSP, PEED, SE and TE), and MBA. It has a strong Industry-Institute partnership, Entrepreneurship cell and R&D cell to enhance the practical knowledge of the students.

Programme Objectives:

The main objectives of the program are:

1. Identify suitable sensors and transducers for real time applications.
2. Translate theoretical concepts into working models.

PROGRAMME REPORT

- Name of the Programme** : Add on Certificate Program on “Sensor Technology”
- Date** : 01-09-2022 to 30-09-2022
- Details of Resource Person** : **Mr. B. Venkateswara Reddy**
M.Tech, (Ph.D)
Associate Professor
Vikas College of Engineering & Technology
Nunna, Vijayawada Rural
Email : bheemireddyv@gmail.com
Contact No: +91-7382053781
- No. of students enrolled** : 59
- Objective of the Programme** :
1. Use Concepts in common methods for converting a physical parameter into electrical quantity.
 2. Design and develop sensors using optical methods with desired properties.
 3. Create analytical design and development solution for sensor.
- Topics covered** :
1. Fundamentals of sensor
 2. Self-Generating Sensors or Active Sensors
 3. Velocity and Acceleration Measurement
 4. Basic Communication of sensor
 5. Types of protocols

6. Calibration and Interfacing
7. Calibration using Master Sensors
8. Interfacing of Force, Pressure, Velocity, Acceleration, Flow, Density and Viscosity Sensors

Learning Outcomes

: Upon completion of the Course,

1. Identify suitable sensors and transducers for real time applications.
2. Translate theoretical concepts into working models.

The course is very useful to the students and their feedback is positive. The management and Dr. B. Ramana, Principal of **Vikas College of Engineering & Technology** thanked the resource person and participants for making the program successful.

About the Institute:

Vikas College of Engineering and Technology established in the year 2009 one of the best known self-financing Integrated educational Institutions aiming to provide excellence in Engineering & Management studies. It is governed by Saraswathi Vidya Peetham to encourage aspiring students with very good Academic record. It offers Under graduate Engineering (Civil, EEE, Mechanical, ECE, CSE and Agriculture) along with PG M. Tech (CSE, VLSID, DECS, EPS, SE, MD and TE), and MBA. It has a strong Industry-Institute partnership, Entrepreneurship cell and R&D cell to enhance the practical knowledge of the students.

About the Department:

Department of agricultural engineering was established in the year 2014. Department of agricultural engineering is one of the new branches of engineering. Department has well equipped laboratories, Workshops and other infrastructure facilities. Department of agricultural engineering is recognized by JNTUK-Kakinada, and AICTE for having full time B.Tech and post graduate program (M.Tech) in Food processing Engineering and Soil & Water conservation Engineering.

Program Objectives:

- ❖ To educate the students about new technologies in the field of Food processing /Food technology
- ❖ To impart knowledge on complete procedures of central and state government supporting schemes for entrepreneurship development in food industries

About the Institute

Vikas College of Engineering and Technology established in the year 2009 one of the best known self-financing Integrated educational Institutions aiming to provide excellence in Engineering & Management studies. It is governed by Saraswathi Vidya Peetham to encourage aspiring students with very good Academic record. It offers Under graduate Engineering (Civil, EEE, Mechanical, ECE, CSE and Agriculture) along with PG M. Tech (CSE, VLSID, DECS, EPS, SE, MD and TE), and MBA. It has a strong Industry-Institute partnership, Entrepreneurship cell and R&D cell to enhance the practical knowledge of the students.

About the Department

Department of Civil engineering was established in the year 2009. Department of Civil engineering is a recognized by JNTUK-Kakinada, and AICTE. Department is offering a full time Under Graduate program (B.Tech) in Civil Engineering and a Post Graduate Program (M.Tech) in Structural Engineering.. Department of Civil engineering is one of the oldest branches of engineering. Department has well equipped laboratories, Workshops and other infrastructure facilities.

Program Objectives

The main objective of this training program to expose the participants to various modeling, design techniques, applied to contemporary problems in the field of Civil Engineering.

PROGRAMME REPORT

- Name of the Programme** : Aone-week Certificate Course on “ANALYSIS OF STRUCTURE USING STAADPRO V8i”
- Date** : 31-10-2022 to 04-11-2022
- Details of Resource Person** : Mr. V.Anusha, Assistant professor,
Department of mechanical engineering,
Vikas college of engineering and technology.
Email: vakkalagaddaanusha7@gmail.com
Contact No: +91-7901053727
- No. of students completed the course** : 21
- Objective of the Programme** :
- To understand the principles of structural analysis and design.
 - To learn the interface and functionalities of STAAD.Pro V8i software.
 - To develop skills in modeling different types of structures in STAAD.Pro.
 - To perform static and dynamic analysis of structures using STAAD.Pro.
 - To interpret analysis results and evaluate structural performance.
 - To design structural elements such as beams, columns, and foundations using STAAD.Pro.
- Syllabus** : **Module 1: Introduction to Structural Analysis**
- Basics of structural analysis and design
 - Types of loads and load combinations
 - Structural behavior under different loading conditions

Module 2: Overview of STAAD.Pro Software

- Introduction to STAAD.Pro V8i interface
- Overview of different modules and functionalities
- Setting up units, coordinate systems, and grid systems

Module 3: Modeling in STAAD.Pro

- Creating structural geometry: nodes, beams, columns, and plates
- Defining properties of structural elements
- Assigning supports and boundary conditions

Module 4: Load Application and Analysis

- Applying various types of loads: dead, live, wind, seismic, etc.
- Performing static analysis: linear and nonlinear
- Dynamic analysis: modal analysis, response spectrum analysis

Module 5: Interpretation of Analysis Results

- Reviewing analysis output: displacements, forces, stresses
- Assessing structural performance and safety factors
- Identifying critical sections and potential failure modes

Module 6: Design of Structural Elements

- Beam design: bending, shear, and deflection checks
- Column design: axial, flexural, and shear checks
- Foundation design: isolated footings, mat foundations
-

Learning Outcomes

- : On successful completion of the course, Students will be able to:
- Understand the fundamental principles of structural analysis and design.
 - Navigate and utilize the interface and functionalities of STAAD.Pro V8i software proficiently.
 - Create accurate and detailed structural models using

STAAD.Pro, including nodes, beams, columns, and plates.

- Apply various types of loads and load combinations to structural models within STAAD.Pro.
- Perform static and dynamic analyses of structures using STAAD.Pro, including linear and nonlinear analysis.
- Interpret analysis results, including displacements, forces, stresses, and safety factors, to assess structural performance.
- Identify critical sections and potential failure modes in analyzed structures.
- Design structural elements such as beams, columns, and foundations according to applicable design codes and standards using STAAD.Pro.
- Apply finite element analysis (FEA) concepts in STAAD.Pro for advanced structural modeling and analysis.
- Model and analyze complex structures such as bridges, towers, and industrial facilities using STAAD.Pro

This certificate course provides comprehensive training in StaadPro leading computer-aided design (CAD) software used extensively in engineering and Building Structures. Students learned fundamental concepts, techniques, and best practices for creating 3D models, assigning Loads, and drawings using Staad Pro.

Students were enthusiastic about the programme, practical sessions were fruitful. Mr.KKD.VaraPrasada Rao (HOD – CE) and Dr. B. Ramana(Principal) thanked the resource person for imparting valuable knowledge to the students.

Date: 06-11-2022

PROGRAMME REPORT

- Name of the Programme** : A one-week Certificate Course on **“ANALYSIS OF STRUCTURE USING STAADPRO V8i”**
- Date** : **31-10-2022 to 04-11-2022**
- Details of Resource Person** : Mr. V.Anusha, Assistant professor,
Department of mechanical engineering,
Vikas college of engineering and technology.
Email: vakkalagaddaanusha7@gmail.com
Contact No: +91-7901053727
- No. of students completed the course** : **21**
- Objective of the Programme** :
- To understand the principles of structural analysis and design.
 - To learn the interface and functionalities of STAAD.Pro V8i software.
 - To develop skills in modeling different types of structures in STAAD.Pro.
 - To perform static and dynamic analysis of structures using STAAD.Pro.
 - To interpret analysis results and evaluate structural performance.
 - To design structural elements such as beams, columns, and foundations using STAAD.Pro.
- Syllabus** : **Module 1: Introduction to Structural Analysis**
- Basics of structural analysis and design
 - Types of loads and load combinations
 - Structural behavior under different loading conditions

- Introduction to STAAD.Pro V8i interface
- Overview of different modules and functionalities
- Setting up units, coordinate systems, and grid systems

Module 3: Modeling in STAAD.Pro

- Creating structural geometry: nodes, beams, columns, and plates
- Defining properties of structural elements
- Assigning supports and boundary conditions

Module 4: Load Application and Analysis

- Applying various types of loads: dead, live, wind, seismic, etc.
- Performing static analysis: linear and nonlinear
- Dynamic analysis: modal analysis, response spectrum analysis

Module 5: Interpretation of Analysis Results

- Reviewing analysis output: displacements, forces, stresses
- Assessing structural performance and safety factors
- Identifying critical sections and potential failure modes

Module 6: Design of Structural Elements

- Beam design: bending, shear, and deflection checks
- Column design: axial, flexural, and shear checks
- Foundation design: isolated footings, mat foundations
-

Learning Outcomes

: On successful completion of the course, Students will be able to:

- Understand the fundamental principles of structural analysis and design.
- Navigate and utilize the interface and functionalities of STAAD.Pro V8i software proficiently.
- Create accurate and detailed structural models using STAAD.Pro, including nodes, beams, columns, and plates.

to structural models within STAAD.Pro.

- Perform static and dynamic analyses of structures using STAAD.Pro, including linear and nonlinear analysis.
- Interpret analysis results, including displacements, forces, stresses, and safety factors, to assess structural performance.
- Identify critical sections and potential failure modes in analyzed structures.
- Design structural elements such as beams, columns, and foundations according to applicable design codes and standards using STAAD.Pro.
- Apply finite element analysis (FEA) concepts in STAAD.Pro for advanced structural modeling and analysis.
- Model and analyze complex structures such as bridges, towers, and industrial facilities using STAAD.Pro

This certificate course provides comprehensive training in StaadPro leading computer-aided design (CAD) software used extensively in engineering and Building Structures. Students learned fundamental concepts, techniques, and best practices for creating 3D models, assigning Loads, and drawings using Staad Pro.

Students were enthusiastic about the programme, practical sessions were fruitful. Mr.KKD.VaraPrasada Rao (HOD – CE) and Dr. B. Ramana (Principal) thanked the resource person for imparting valuable knowledge to the students.

About the Institutions

Vikas College of Engineering and Technology, located in Krishna, Andhra Pradesh, is a prominent institution specializing in engineering and technical education. Established in the year 2008, affiliated to Jawaharlal Nehru Technological University Kakinanda. It is governed by Saraswati Vidya Peetam to encourage aspiring students with very good Academic record. It offers Under graduate Engineering (Civil, EEE, Mechanical, CE, CSE-AIML, DS and Agriculture) along with PG M. Tech (CSE, MS, SSP, PEED, SE and MD) and MBA. It has a strong Industry-institute partnership, Entrepreneurship cell and R&D cell to enhance the practical knowledge of the students.

Programme Objectives:

The main objectives of the program are:

Object: A logical entity that interacts with the user-defined class by invoking methods/functions

Class: A template/blueprint defined by a user using which objects are created

Class definition files: Enable definition of properties, methods, and

About the Institute:

Vikas College of Engineering and Technology established in the year 2009 one of the best known self-financing Integrated educational Institutions aiming to provide excellence in Engineering & Management studies. It is governed by Saraswathi Vidya Peetham to encourage aspiring students with very good Academic record. It offers Under graduate Engineering (Civil, EEE, Mechanical, ECE, CSE and Agriculture) along with PG M. Tech (CSE, VLSID, DECS, EPS, SE, MD and TE), and MBA. It has a strong Industry-Institute partnership, Entrepreneurship cell and R&D cell to enhance the practical knowledge of the students.

About the Department:

Department of mechanical engineering Was established in the year 2009. Department of mechanical engineering is one of the oldest branches of engineering. Department has well equipped laboratories, Workshops and other infrastructure facilities. Department of mechanical engineering is a recognized by JNTUK-Kakinada, and AICTE for having full time B.Tech and post graduate program (M.Tech) in Thermal Engineering & Machine Design.

Program Objectives:

- ❖ Understand the principles and key technologies of Industry 4.0.
- ❖ Analyze the impact of Industry 4.0 on traditional manufacturing processes.
- ❖ Explore the integration of digital and physical systems in smart manufacturing environments.
- ❖ Develop strategies for implementing Industry 4.0 technologies within manufacturing organizations.
- ❖ Evaluate the challenges and opportunities associated with the adoption of Industry 4.0.

Email: masthanaiyah.thummalapudi@gmail.com
Contact No: +91-9246479995
- No. of students Attended** : 23
- Objective of the Programme** :
- ❖ Understand the principles and key technologies of Industry 4.0.
 - ❖ Analyze the impact of Industry 4.0 on traditional manufacturing processes.
 - ❖ Explore the integration of digital and physical systems in smart manufacturing environments.
 - ❖ Develop strategies for implementing Industry 4.0 technologies within manufacturing organizations.
 - ❖ Evaluate the challenges and opportunities associated with the adoption of Industry 4.0.

Overview of Industry 4.0 concepts and principles
Historical context and evolution of manufacturing paradigms
Key technologies driving Industry 4.0: IoT, AI, robotics, etc.

❖ Cyber-Physical Systems (DAY-2)

Understanding cyber-physical systems (CPS)
Digital twins and their role in smart manufacturing

❖ Internet of Things (IoT) in Manufacturing (DAY-2)

Introduction to IoT and its applications in manufacturing
IoT sensors and data collection techniques
IoT platforms and connectivity standards

❖ Advanced Robotics and Automation (DAY-3)

Overview of advanced robotics technologies
Collaborative robots (cobots) and human-robot collaboration
Automation of manufacturing processes using robotics

❖ Additive Manufacturing (3D Printing) (DAY-3 & 4)

Introduction to additive manufacturing technologies
Applications of 3D printing in prototyping and production
Advantages and challenges of additive manufacturing

❖ Augmented Reality (AR) and Virtual Reality (VR)
(DAY-4)

Understanding AR and VR technologies
Applications of AR and VR in manufacturing
Training and simulation using AR and VR

❖ Cybersecurity in Smart Manufacturing (DAY-5)

Overview of cybersecurity threats in manufacturing
Strategies for securing smart manufacturing systems
Compliance and regulations related to cybersecurity

❖ Future Trends and Emerging Technologies (DAY-6)

Emerging trends in smart manufacturing
Predictive maintenance and predictive analytics
Industry 5.0 and beyond: the future of manufacturing

be able to:

1. Understand Industry 4.0 Concepts.
2. Have Knowledge of Smart Manufacturing Technologies.
3. Analyze Smart Manufacturing Processes.
4. Have Knowledge about Integration of Digital and Physical Systems.
5. Evaluate strategies for implementing Industry 4.0 technologies.
6. Know the importance of cybersecurity in industry 4.0 manufacturing environments.

This course provided an in-depth examination of Industry 4.0 and its impact on modern manufacturing processes for the mechanical engineering students. Students has explored the concepts, technologies, and strategies associated with smart manufacturing, with an emphasis on practical applications.

Students were enthusiastic though out the programme and gave positive feedback for structured execution of the course Mr. M V U Baskhara Rao (HOD – ME) and Dr. B. Ramana (Principal) thanked the resource person for imparting valuable knowledge to the students.

About the Institute:

Vikas College of Engineering and Technology established in the year 2009 one of the best known self-financing Integrated educational Institutions aiming to provide excellence in Engineering & Management studies. It is governed by Saraswathi Vidya Peetham to encourage aspiring students with very good Academic record. It offers Under graduate Engineering (Civil, EEE, Mechanical, ECE, CSE and Agriculture) along with PG M. Tech (CSE, VLSID, DECS, EPS, SE, MD and TE), and MBA. It has a strong Industry-Institute partnership, Entrepreneurship cell and R&D cell to enhance the practical knowledge of the students.

About the Department:

Department of mechanical engineering Was established in the year 2009. Department of mechanical engineering is one of the oldest branches of engineering. Department has well equipped laboratories, Workshops and other infrastructure facilities. Department of mechanical engineering is a recognized by JNTUK-Kakinada, and AICTE for having full time B.Tech and post graduate program (M.Tech) in Thermal Engineering & Machine Design.

Program Objectives:

- ❖ Understand the interface and basic functionalities of SolidWorks.
- ❖ Create 3D models of parts and assemblies using SolidWorks.
- ❖ Generate technical drawings and documentation from SolidWorks models.
- ❖ Apply advanced modeling techniques and features to optimize designs.
- ❖ Develop practical skills for solving engineering design challenges using SolidWorks.

Department of Mechanical
VIKAS COLLEGE OF ENGG. & TECH.
NUNNA, Vijayawada (R), N. T. R. Dist.

- Advanced sketching techniques: relations and dimensions
- Creating basic 3D features: extrudes, revolves, sweeps, and lofts
- Introduction to reference geometry and design intent

Module 3: Advanced Features and Modelling Techniques

- Using advanced features: fillets, chamfers, shells, and ribs
- Creating patterns: linear, circular, and sketch-driven patterns
- Designing with symmetry and mirroring features

Module 4: Assemblies and Mates

- Introduction to assembly modeling
- Creating and managing assemblies in SolidWorks
- Applying mates to constrain and define assembly relationships

Module 5: Advanced Assembly Techniques

- Advanced mate types: mechanical mates, width and angle mates
- Exploded views and assembly animations
- Top-down and bottom-up assembly design approaches

Module 6: Surfacing and Advanced Modelling

- Introduction to surface modelling in SolidWorks
- Creating complex shapes and curvature using surfaces
- Applying surface features and techniques to optimize designs

Learning Outcomes

- On successful completion of the course, Students will be able to:
 1. Have Proficiency in SolidWorks Interface
 2. Create 3D models of parts and assemblies using SolidWorks
 3. Apply geometric and dimensional constraints to sketches

PROGRAMME REPORT

- Name of the Programme** : A one-week Certificate Course on “SOLID WORKS”
- Date** : 06-02-2023 to 11-02-2023
- Details of Resource Person** : Mr. K. Vamsidhar, Assistant professor,
Department of mechanical engineering,
Vikas college of engineering and technology.
Email: kvamsidhar777@gmail.com
Contact No: +91-8985453777
- No. of students completed the course** : 26
- Objective of the Programme** :
1. Understand the interface and basic functionalities of SolidWorks.
 2. Create 3D models of parts and assemblies using SolidWorks.
 3. Generate technical drawings and documentation from SolidWorks models.
 4. Apply advanced modeling techniques and features to optimize designs.
 5. Develop practical skills for solving engineering design challenges using SolidWorks.
- Syllabus** : **Module 1: Introduction to SolidWorks**
- Overview of CAD software and SolidWorks interface
 - Basic navigation and customization of the SolidWorks environment
 - Introduction to sketching: creating 2D sketches and constraints

4. Utilize advanced modeling features such as sweeps, lofts, patterns, and configurations.
5. Capable of creating and managing assemblies.
6. Apply sketching and Advanced modelling concepts in solid works.

This certificate course provides comprehensive training in SolidWorks, a leading computer-aided design (CAD) software used extensively in engineering and manufacturing industries. Students learned fundamental concepts, techniques, and best practices for creating 3D models, assemblies, and drawings using SolidWorks.

Students were enthusiastic about the programme, practical sessions were fruitful. Mr. M V U BaskharaRao (HOD – ME) and Dr. B. Ramana (Principal) thanked the resource person for imparting valuable knowledge to the students.

- Objective of the Programme** :
1. Understand the principles and importance of conceptual design in software engineering.
 2. Analyze requirements and stakeholder needs to inform the conceptual design process.
 3. Apply modeling techniques to represent software systems at a conceptual level.
 4. Develop proficiency in system architecture design and component identification.
 5. Evaluate and iterate on conceptual designs to refine system requirements and improve design quality.
- Topics covered** :
1. Introduction to Software Conceptual Design
 2. Requirements Analysis and Stakeholder Needs
 3. Conceptual Modeling Techniques
 4. System Architecture Design
 5. Component-Based Design
 6. Iterative Design and Prototyping
 7. Design Evaluation and Validation
 8. Design Documentation and Communication
 9. Design Patterns and Anti-Patterns
 10. Case Studies and Best Practices

- Learning Outcomes** :
1. Understanding of Conceptual Design Principles
 2. Requirements Analysis and Stakeholder Needs
 3. Proficiency in Conceptual Modeling
 4. System Architecture Design Skills
 5. Component-Based Design Expertise
 6. Iterative Design and Prototyping
 7. Design Evaluation and Validation
 8. Effective Design Documentation and Communication
 9. Awareness of Design Patterns and Anti-Patterns
 10. Application of Best Practices and Case Studies

This course provides a comprehensive exploration of conceptual design principles and methodologies in software engineering. Students have learned to analyze requirements, define system architecture, and create conceptual models to guide the development of software systems.

Students find this course very useful especially as they were about to face the real world challenges after their final year of B.Tech course. HOD and Principal are thankful to the resource person and congratulated the course coordinator for the successful execution of the programme.

- No. of students enrolled** : 92
- Learning Outcomes** : On completion of the course, Students will be able to
1. Understand the fundamental concepts of parallel computing, including parallelism, concurrency, and scalability.
 2. Analyze and compare different parallel architectures, such as shared memory and distributed memory systems.
 3. Design and implement parallel algorithms for various computational problems.
 4. Demonstrate proficiency in parallel programming using high-level parallel programming models (e.g., OpenMP, MPI).
 5. Identify and address common challenges in parallel computing, such as race conditions, deadlocks, and load imbalance
 6. Evaluate the performance of parallel programs and identify opportunities for optimization

- Topics covered** :
1. Introduction to Parallel Computing
 2. Parallel Programming Models
 3. Parallel Algorithms
 4. Synchronization and Communication
 5. Load Balancing and Scalability
 6. Performance Optimization
 7. Parallel Applications

This course introduces the principles and techniques of parallel computing, focusing on both shared memory and distributed memory systems. Topics covered include parallel algorithms, parallel programming models, synchronization, load balancing, and performance evaluation.

Students find this course very useful. Many students find the topics interesting and they expressed their will to do a project on parallel computing. Principal (Dr. B. Ramana) appreciated the resource person (Mr. M Ashok Kumar – HOD CSE) and congratulated the course coordinator for the successful execution of the programme.

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

Date: 16-02-2023

PROGRAMME REPORT

- Name of the Programme** : A one-week Certificate Course on “**ETHICAL HACKING**”
- Date** : **06-02-2023 to 11-02-2023**
- Details of Resource Person** : **Mr. S. RAMESH**, Assistant Professor
Department of CSE
Vikas College of Engineering & Technology
Nunna, Vijayawada Rural
Email: rameshsaggurthi1245@gmail.com
Contact No: +91-9948308642
- No. of students enrolled** : 106
- Objective of the Programme** :
1. Introduce students to the fundamental concepts of ethical hacking, including terminology, methodologies, and legal and ethical considerations.
 2. Develop proficiency in offensive security techniques such as reconnaissance, scanning, enumeration, exploitation, and post-exploitation.
 3. Learn to identify and exploit common security vulnerabilities in networks, systems, applications, and web services using various tools and techniques.
 4. Gain hands-on experience in conducting penetration tests to assess the security posture of organizations and identify potential weaknesses and vulnerabilities.
 5. Apply ethical hacking methodologies such as the Open Web Application Security Project (OWASP) Testing Guide and the Penetration Testing Execution Standard (PTES) to systematically assess and secure information systems.
- Topics covered** :
1. Introduction to Ethical Hacking
 - Overview of ethical hacking
 - Legal and ethical considerations

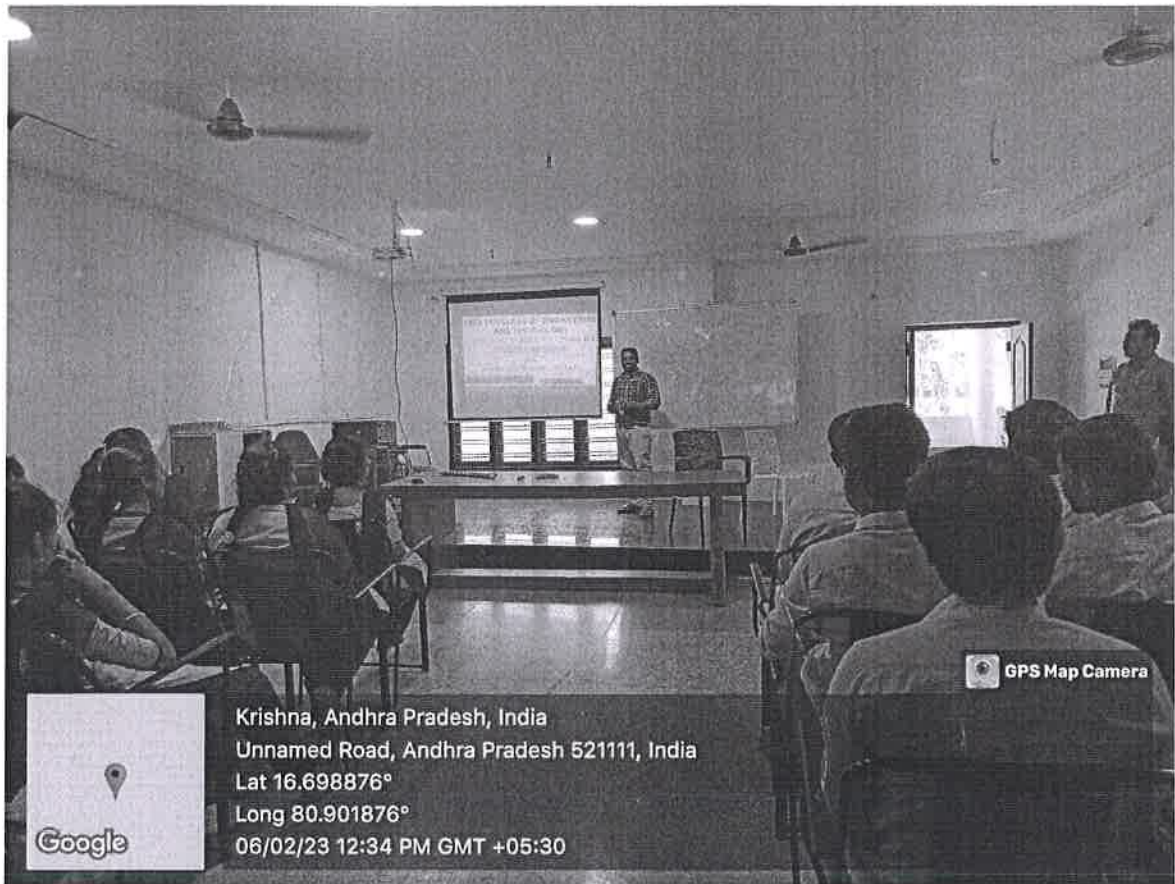

- Introduction to hacking methodologies and tools
- 2. Footprinting and Reconnaissance
 - Information gathering techniques
 - Network mapping and OSINT
 - Enumerating network services and hosts
- 3. Scanning and Enumeration
 - Port scanning techniques
 - Service enumeration
 - Vulnerability scanning
- 4. Exploitation and post-exploitation
 - Exploitation techniques
 - Privilege escalation
 - Maintaining access and covering tracks
- 5. Web Application Security
 - Web application architecture
 - OWASP Top 10 vulnerabilities
 - Web application penetration testing

Learning Outcomes

On completion of the course, Students will be able to

1. Identify and assess security vulnerabilities in networks, systems, applications, and web services using ethical hacking techniques and tools.
2. Successfully exploit security vulnerabilities to demonstrate their impact and potential risks to organizations and stakeholders.
3. Plan, execute, and report on penetration tests following established methodologies to assess the security posture of organizations and recommend remediation measures.
4. Recommend and implement security controls and best practices to mitigate identified vulnerabilities and improve the overall security posture of organizations.
5. Conduct ethical hacking activities in compliance with legal and ethical standards, respecting the confidentiality, integrity, and availability of information assets.

Photographs:

This course provides an in-depth exploration of ethical hacking techniques and cybersecurity principles. Students will learn to identify vulnerabilities, exploit security weaknesses, and mitigate cyber threats through hands-on labs, simulations, and real-world scenarios.

Students find this course very useful and very enthusiastic throughout the course HOD (Mr. M Ashok Kumar) and Principal (Dr. B. Ramana) are thankful to the resource person and congratulated the course coordinator for the successful execution of the programme.

About the Institute

Vikas College of Engineering and Technology established in the year 2009 one of the best known self-financing Integrated educational Institutions aiming to provide excellence in Engineering & Management studies. It is governed by Saraswathi Vidya Peetham to encourage aspiring students with very good Academic record. It offers Under graduate Engineering (Civil, EEE, Mechanical, ECE, CSE and Agriculture) along with PG M. Tech (CSE, VLSID, DECS, EPS, SE, MD and TE), and MBA. It has a strong Industry-Institute partnership, Entrepreneurship cell and R&D cell to enhance the practical knowledge of the students.

About the Department

Department of Civil engineering was established in the year 2009. Department of Civil engineering is a recognized by JNTUK-Kakinada, and AICTE. Department is offering a full time Under Graduate program (B.Tech) in Civil Engineering and a Post Graduate Program (M.Tech) in Structural Engineering.. Department of Civil engineering is one of the oldest branches of engineering. Department has well equipped laboratories, Workshops and other infrastructure facilities.

Program Objectives

The main objective of this training program to expose the participants to various modeling, design techniques, applied to contemporary problems in the field of Civil Engineering.

PROGRAMME REPORT

Name of the Programme	:	A One Week Certificate Course on “ MAINTENANCE AND REPAIR OF CONCRETE STRUCTURES ”
Date	:	13-02-2023 to 17-02-2023
Details of Resource Person	:	Mr. KKD VARAPRASADA RAO, Associate Professor & Head, CE Vikas College of Engineering & Technology Nunna, Vijayawada Rural Email: hodcivil.vikas@gmail.com Contact No: +91-7382053814
No. of students completed the course	:	42
Objective of the Programme	:	<ul style="list-style-type: none">➤ Understand the common types of deterioration in concrete structures.➤ Recognize the importance of regular inspection and maintenance for concrete structures.➤ Identify suitable repair materials and techniques for different types of damage.➤ Demonstrate basic skills in executing simple concrete repair tasks.➤ Appreciate the significance of proper maintenance and repair in extending the service life of concrete structures.
Detailed syllabus	:	Module 1: Introduction to Concrete Deterioration <ul style="list-style-type: none">➤ Overview of concrete deterioration mechanisms➤ Chemical, physical, and environmental factors affecting concrete durability➤ Case studies of concrete deterioration in real-world

Module 2: Inspection and Assessment Techniques

- Visual inspection methods
- Non-destructive testing (NDT) techniques
- Laboratory testing for material characterization
- Interpretation of inspection results and defect assessment

Module 3: Repair Materials

- Types of repair materials: cementitious, epoxy, polymer-based, etc.
- Properties and characteristics of repair materials
- Selection criteria for repair materials based on application requirements

Module 4: Repair Techniques

- Surface preparation methods: cleaning, grinding, shot blasting
- Crack repair techniques: epoxy injection, routing and sealing
- Spall repair techniques: patching, grouting, and overlay
- Cathodic protection and corrosion mitigation strategies

Module 5: Case Studies and Best Practices

- Analysis of real-world repair projects
- Success stories and lessons learned from concrete repair projects
- Best practices for maintenance and repair of concrete structures

Module 6: Implementation and Quality Control

- Planning and scheduling maintenance and repair activities
- Quality control measures during repair implementation
- Monitoring and performance evaluation of repaired structures

will be able to:

1. Identify common causes of deterioration in concrete structures, including chemical, physical, and environmental factors.
2. Perform visual inspections and apply non-destructive testing (NDT) techniques to detect defects in concrete structures.
3. Analyze inspection results and assess the severity of concrete deterioration.
4. Select appropriate repair materials based on the type and extent of damage in concrete structures.
5. Apply surface preparation techniques effectively, including cleaning, grinding, and shot blasting.
6. Implement crack repair techniques such as epoxy injection and routing and sealing.
7. Execute spall repair techniques including patching, grouting, and overlay application.
8. Evaluate the effectiveness of cathodic protection and corrosion mitigation strategies.
9. Develop maintenance and repair plans for concrete structures, including scheduling and resource allocation.
10. Implement quality control measures during repair activities to ensure the durability and longevity of repaired structures.
11. Analyze case studies and real-world repair projects to understand best practices and lessons learned.
12. Evaluate emerging technologies and innovative materials for concrete repair and maintenance.
13. Apply sustainable repair materials and techniques to minimize environmental impact.
14. Develop predictive maintenance strategies for concrete structures to enhance long-term performance.

This course provided an in-depth Understanding failure in a building structure and different Non-Destructive tests on a structure's failures and cracks.

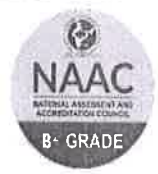

Students were enthusiastic though out the programme and gave positive feedback for structured execution of the course Mr. KKD Varapasada Rao (HOD – CIVIL) and Dr. B. Ramana (Principal) thanked the resource person for imparting valuable knowledge to the students.

About the Institute:

Vikas College of Engineering and Technology established in the year 2009 one of the best known self-financing Integrated educational Institutions aiming to provide excellence in Engineering & Management studies. It is governed by Saraswathi Vidya Peetham to encourage aspiring students with very good Academic record. It offers Under graduate Engineering (Civil, EEE, Mechanical, ECE, CSE and Agriculture) along with PG M. Tech (CSE, VLSID, DECS, EPS, SE, MD and TE), and MBA. It has a strong Industry-Institute partnership, Entrepreneurship cell and R&D cell to enhance the practical knowledge of the students.

About the Department:

Department of agricultural engineering was established in the year 2014. Department of agricultural engineering is one of the new branches of engineering. Department has well equipped laboratories, Workshops and other infrastructure facilities. Department of agricultural engineering is recognized by JNTUK-Kakinada, and AICTE for having full time B.Tech and post graduate program (M.Tech) in Food processing Engineering and Soil & Water conservation Engineering.

Program Objectives:

- ❖ Introduction about drones in the field of Modern agriculture
- ❖ To give an over view about different operations by using drones in the field level
- ❖ Importance of drone technology in precision agriculture, cost & time saving, improved data collection, enhanced crop management and environmental sustainability

PROGRAMME REPORT

Name of the Programme	:	A FIVE DAY Certificate Course on“DRONE TECHNOLOGY IN THE FIELD OF FARM MECHANIZATION”
Date	:	01-03-2023 to 06-03-2023
Details of Resource Person	:	1. Ms. N. Anusha Assistance Professor AGE Vikas Group of Institutions Nunna, Vijayawada Rural Email: anusha.agrineer@gmail.com Contact No: 8985775365
No. of students enrolled	:	63
Objective of the Programme	:	1. Introduction about drones in the field of Modern agriculture 2. To give an over view about different operations by using drones in the field level 3. Importance of drone technology in precision agriculture, cost & time saving, improved data collection, enhanced crop management and environmental sustainability
Syllabus	:	Chapter 1 : Introduction to Drones and their functioning ➤ Overview of drones usage in various fields ➤ Operating mechanisms of drones Chapter 2: IOT in drones ➤ Importance of IOT in drones for efficient operation. ➤ Various Controllers like Electronic Speed Controllers

(ESC), Transmitters, Receivers & flight Controllers for Drones.

- Assembling, MRO & battery care of Drones.

Chapter 3: Payload considerations like Cameras, Gimbals & other payloads and make use of them in drone flying/maintenance.

- Introduction to pay loads in aeronautical designs
- Consideration procedures for pay loads
- Application in the design aspects of aeronautics

Chapter 4: Different types of Airframes & Propellers in drone flying

- Introduction to Airframes & Propellers
- Design aspects according to the purpose of drones
- Advanced aircrafts in various robotic drains and their efficiency parameters.

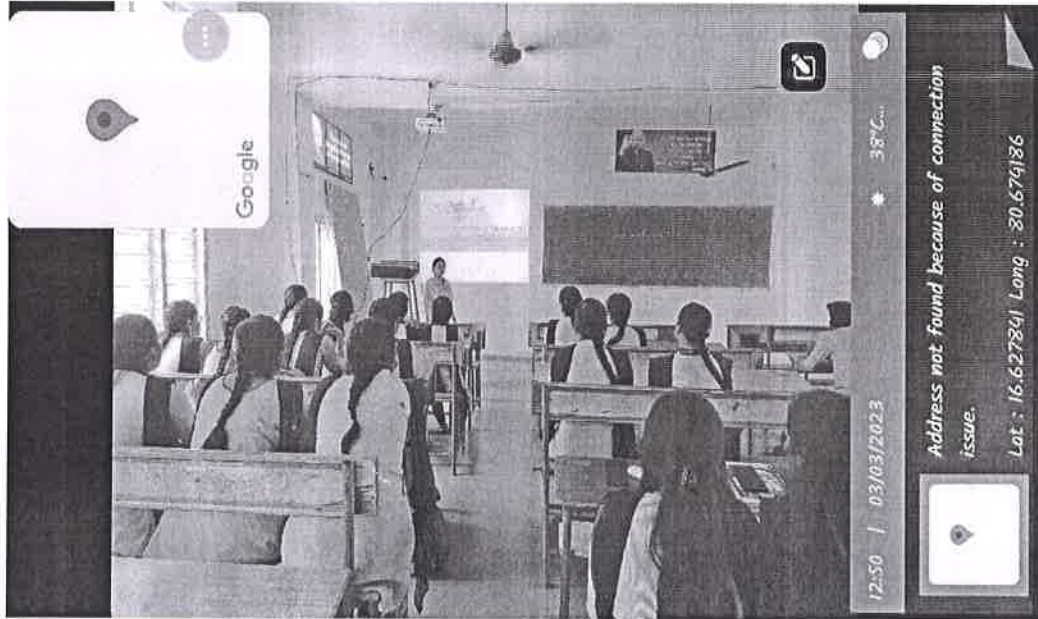

Chapter 5: Advanced Assembly Techniques

- Introduction to advanced assembly techniques.
- Assembly and various systems in the drones.
- Assembling, MRO & battery care of Drones.

Learning Outcomes

- : On successful completion of the course, Students will be able to:
1. Have Proficiency in Drones and their functioning
 2. They will be proficient in design considerations
 3. Gains knowledge of Ground Control Stations & FPV.
 4. Utilizes advanced assembly techniques for complete assembling of MRO & battery care drones, cameras and gimbals.
 5. Acquired knowledge on how play load considerations helps in efficient design models
 6. Gains knowledge on importance of drone technology in precision agriculture, cost & time saving, improved data collection, enhanced crop management and environmental sustainability

Photographs:

This certificate course provides comprehensive knowledge on drone and operating mechanisms usage for modern agriculture. Students learned fundamental concepts of operating mechanisms, Play load considerations in design aspects, assemblies, and knowledge of Ground Control Stations & FPV

.Students were enthusiastic about the programme, practical sessions were fruitful. and Dr. A. RAVI KUMAR (HOD – AGE), Dr.B. Ramana(Principal) thanked the resource person for imparting valuable knowledge to the students.

About the Institute:

Vikas College of Engineering and Technology established in the year 2009 one of the best known self-financing Integrated educational Institutions aiming to provide excellence in Engineering & Management studies. It is governed by Saraswathi Vidya Peetham to encourage aspiring students with very good Academic record. It offers Under graduate Engineering (Civil, EEE, Mechanical, ECE, CSE and Agriculture) along with PG M. Tech (CSE, VLSID, DECS, EPS, SE, MD and TE), and MBA. It has a strong Industry-Institute partnership, Entrepreneurship cell and R&D cell to enhance the practical knowledge of the students.

About the Department:

Department of agricultural engineering was established in the year 2014. Department of agricultural engineering is one of the new branches of engineering. Department has well equipped laboratories, Workshops and other infrastructure facilities. Department of agricultural engineering is recognized by JNTUK-Kakinada, and AICTE for having full time B.Tech and post graduate program (M.Tech) in Food processing Engineering and Soil & Water conservation Engineering.

Program Objectives:

- ❖ To foster the knowledge of new innovative technologies in the field of food packaging
- ❖ Creating awareness about "NANO- TECHNOLOGY" based active packaging, smart packaging , bio- packaging ,edible & non- edible packaging
- ❖ Educating students on "NANO-FILTRATION & NANO-ENCAPSULATION" technologies

Photographs:

This course provides a wide understanding of nano technology applications in the field of Agricultural Engineering. Students have learned how well a packaging film can enhance the self life and nutrients retention.

Students find this course very useful to acquire in deep knowledge on nano technology in the field of food packaging and helps them in designing new technologically beneficial pacakaging films for second year B.Tech students. HOD and Principal are thankful to the

resource person and congratulated the course coordinator for the successful execution of the programme.

About the Institutions

Vikas College of Engineering and Technology, located in Krishna, Andhra Pradesh, is a prominent institution specializing in engineering and technical education. Established in the year 2008, affiliated to Jawaharlal Nehru Technological University Kakinanda. It is governed by Saraswati Vidya Peetam to encourage aspiring students with very good Academic record. It offers Under graduate Engineering (Civil, EEE, Mechanical, ECE, CSE-AIML, DS and Agriculture) along with PG M. Tech (CSE, ES, SSP, PEED, SE and MD) and MBA. It has a strong Industry-Institute partnership, Entrepreneurship cell and R&D cell to enhance the practical knowledge of the students.

Programme Objectives:

The main objectives of the program are:

1. To provide students with the knowledge and skills necessary to program and operate PLCs.
 2. To prepare students for careers in industrial automation and control.
- To help students develop their problem-solving and critical thinking skills.
